

## STA4502S (Monte Carlo Estimation), Winter 2013

Class Participation: worth 10% of final course grade.

In this class, 10% of your grade will be based on your class participation.

To earn class participation points, you should:

- Attend lectures regularly.
- Arrive punctually (i.e., by 11:10) for all lectures.
- Sit in the front half of the classroom during lectures.
- Pay close attention during class lectures.
- Answer questions posed by the instructor during class (e.g. verbally, or by a show of hands, as appropriate) whenever possible.
- Pose questions of your own in class if/when they arise.
- After a lecture is completed, some time before the following lecture, you should:  
(a) review the class's lecture notes, and (b) review the source code of the programs presented, and (c) try running the programs yourself as appropriate, and (d) perhaps try modifying the programs in various (minor) ways and re-running them.
- At the start of the next lecture, you should be prepared, as appropriate, to discuss what you have learned from reviewing the previous lecture.
